**Note:** Newer Models of the listed devices and Smart TVs equipped with Amazon, Roku and/or AppleTV software may work in most cases but are not guaranteed. Newer device models will generally work, provided that they are models that have increased memory and processing power over models already supported above. New models that are cheaper and reduce memory and/or processing power, or which support just 30 fps, may not work and are not supported. Examples of non-supported devices are Fire TV Stick Lite and other devices on the lower-end that do not have the power to run the OTCtv app.
